330PS

The AGM 330PS and 430PS are the prism scopes with ultra-clear optical quality for medium range shooting. Their long eye relief and large field of view help shooters capture the target.

The 5 illumination levels allow the user to adjust to all outdoor light conditions. The reticle is etched directly on the prism and the windage and elevation turrets are precisely machined to ensure accuracy.

- **More than 120 MOA adjustment range**
- **5 illumination levels**
- **Fully multi-coated & long eye relief & large FOV**
- **IPX7 waterproof**
- **Fog resistant**
